Finally got through to VIA.

They do have a GBO issued to all trains to be on the lookout for unsafe conditions within the Ottawa area, I have requested a copy. Additionally after discussing that area, they agree that further measures may be warranted within the mile range of 65 to 70 of the Alexandria Subdivision.

Mr. Bitlan from VIA will be coordinating with his team this afternoon to determine what those measures will look like. Once I hear more, ill update you as appropriate.

Cheers

Philip Merkley

Hey Colin

Small update.

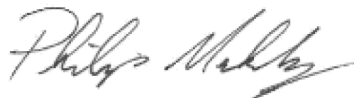

I have not been successful in reaching my VIA rail contacts, however I have left clear messages and followed up with an email this morning.

For curiosity I did reach out to the City of Ottawa's rail safety specialist within transportation services. She has advised me that the City of Ottawa has activated there Traffic Incident Management Group (TIMG) emergency response, this means they are well coordinated with Police, Fire, and road crews specifically for this event.

I advised her of the areas that are potential to be impacted, which she mentioned that they did not have a plan in place to mitigate potential risks, however now that they are aware they will be dispatching traffic inspectors members to review the locations today and over the weekend to ensure queuing does not become a problem.

If and when I hear from VIA, I'll let you know.

Thank you

I'm having trouble contacting Marius. His numbers are all out of service.

I reached out to Yannick Warin director of infrastructure as well as Derick Tardif project manager infrastructure. Left both a message, likely won't get a call back today during business hours.

I could reach out to Marius Bitlan at VIA,

however I think the main thing here would be to handle this from an operations perspective as well as signals.

I reach out to Marius now.

Stay tuned for an update

Hi Colin

TC's NCR Facilities Management and Security team have been in ongoing communication with regional security officers, who are monitoring the convoy situation. I talked to my colleagues in other regions where the convoy has passed through, and there have been no rail safety related issues or incidents reported to date. I have included Jay in this correspondence as he may wish to weigh in on this, but I don't see us reaching out to project life saver regarding this situation. You might want to reach out to your VIA contact to make some inquiries as I noticed below the crossings Phil references are all on VIA track, but at this time I don't see any other action required on our part.

Thanks

Mike

Subject: Freedom Rally now in Ontario, heading to Ottawa Saturday January 29, 2022

Hi Colin

As a follow-up to my comment on this morning's engineering call, the Freedom rally (Convoy of tractor trailers, etc. from all over Canada and parts of the US) are set to hit the capital on Saturday January 29, 2022.

What does this mean for rail safety?, well, I believe that as a result of the increased traffic volumes on local highways (17, 417, 401, 416), adjacent side streets and intersecting roads are likely and expected to experience delays as well as significant volume increases. This means there is an increased risk that grade crossings in the area may be impacted as a result of possible traffic queuing or other unforeseen issues.

I am curious what action if any HQ has taken with respect to this rally thus far? and if no national action has been taken, should we act as a region?

Below are a few links from the media:

<https://ottawa.ctvnews.ca/police-urge-public-to-avoid-downtown-ottawa-during-trucker-convoy-protest-1.5755382>

<https://ca.news.yahoo.com/truckers-freedom-rally-convoy-passes-131157411.html>

<https://www.thestar.com/news/canada/2022/01/25/freedom-rally-truckers-convoy-hits-ontario-picking-up-conservative-political-support-as-it-rolls.html>

Grade crossings that are in my opinion at a heightened risk are shown below highlighted in yellow, this is not to say that others listed below or not listed here are risk free:
